

PBE HYBRID

Your ultimate 2-in-1 electric golf buggy / trolley

The Hybrid turns from a powered walk-behind trolley into a sturdy stand-on buggy: ride it or walk it, whenever you like.

Two 800 W hub motors carry you and a full bag up gradients of 20°, and regenerative braking controls your speed on the way back down.

27–36 holes

per charge, specified for riding (20–35 km / 12–22 miles)

1,600 W

combined output, two 800 W hub motors

20°

maximum climb, approx. 36% gradient

120 kg

total capacity: rider, bag and clubs

Why Choose The Hybrid?

- **Ultimate versatility.** Ride it as a stand-on buggy or walk behind it in powered trolley mode. One machine, both ways to play.
- **Brakes that need no upkeep.** Regenerative EABS through the motors, worked by the left brake paddle. No pads or discs. Hill-hold holds the buggy while you play your shot.
- **Folds in seconds.** Down to 53 × 37 cm and into the boot without dismantling anything.
- **Genuine hill performance.** 1,600 W of combined output tackles 20° gradients with a full bag on board.
- **Two battery options.** Rear-mounted, key-locked and removable. 14 Ah for 27 holes, 20 Ah for 36, specified for riding.
- **Irish owned, properly supported.** Built for Irish and UK conditions, backed by our own team, not a factory marketplace seller.

Easy Setup & Transport

The Hybrid folds down in seconds and sits neatly in a car boot. Always remove the battery before lifting: the frame is 28 kg on its own, so use both hands and take it steadily. Switch between walking and riding whenever you like.

Technical Specifications

MOTOR

2 × 800 W brushless hub motors (1,600 W total)

BATTERY

48 V lithium-ion · 14 Ah standard, 20 Ah upgrade

BATTERY MOUNTING

Rear-mounted, swappable, key-locked

RANGE

20–35 km (12–22 miles) · 27–36 holes

CHARGING TIME

6–8 hours from empty

SPEED MODES

5 / 15 / 25 km/h, plus reverse

CRUISE MODE

Hands-free at 4 or 6 km/h in Trolley Mode

CLIMBING ABILITY

Up to 20° (approx. 36% gradient)

BRAKING

Regenerative EABS · hill-hold holds it while you play

TURNING RADIUS

≤ 1.8 m

TYRES

85/65-6.5 rear pneumatic turf tread (30 psi), front air-free

FRAME

Aluminium alloy

HANDLEBAR HEIGHT

Adjustable 95–140 cm

DIMENSIONS UNFOLDED

93.5 (L) × 86 (W) × 95 (H) cm

DIMENSIONS FOLDED

95 (L) × 53 (W) × 37 (D) cm

WEIGHT

28 kg excl. battery · 3.5 kg battery · 31.5 kg total

MAX LOAD

120 kg all-in (18.9 stone / 265 lb)

WARRANTY

1-year buggy · 2-year battery

Please note: Braking is regenerative, through the dual motors and worked by the left brake paddle. There are no mechanical brakes. Control your speed on descents with the paddle: hill-hold will not hold your weight as well as the unit. It engages once you release the paddle and step off, holding the buggy on a slope, uphill or downhill, bag and clubs included, and it keeps holding for as long as the unit stays switched on. It is not a parking brake, so park on level ground before you power down. On the occasional very steep climb or descent, switch to Trolley Mode and walk it. **Turf:** Loaded, the Hybrid is about a third the weight of a ride-on cart. The rear turf-tread tyres can be run below 30 psi for soft ground. Data sheet for course managers on request. CE marked. Declaration of Conformity available on request. For use on golf courses and private land only.

Ordering & Delivery

- Duty and VAT are included in the price, so there is nothing to pay on arrival.
- Free delivery to Ireland, the UK, Europe, the USA, Canada, Australia and New Zealand.
- Supplied with its 48 V battery, charger, umbrella holder and mount as standard, printed user manual and a 1-year buggy / 2-year battery warranty.
- Current lead time is approximately 8–12 weeks from order to delivery.

The Hybrid: Experience Golf, Your Way

1-Year Buggy Warranty · 2-Year Battery Warranty · Free Delivery

Price includes duty and VAT. No charges on arrival
